

ESP Quick Tip #32: View Site Statistics

2022-03-17 - Jennifer S - ESP Quick Tips

ESP Websites and Company Stores provide helpful statistics about your site. To access the general statistics for a site, log into ESP and then click on the Websites Admin tab.

Locate the site for which you would like to view the data and then click on the Stats button.

You will be brought directly into the statistics page where you can view the data for the last 30 days:

- The number of visitors to this site
- How many products were viewed
- How many searches have been performed

Shop stats for the last 30 days

Visitors	Products Viewed	Searches
 2	 5	 4

Enable [Google Analytics](#) Enable to gather site visitor statistics, i.e hit reports. This information is invaluable for creating an effective website that meets the needs of your customers.

Manage Google Analytics

You can also click on the Manage Google Analytics button to view more in-depth site usage data. For more information on how to link your ESP Website or Company Store with Google Analytics, please review the [Using Google Analytics](#) section of the Analytics, Meta Tags, and

SEO article.
